BP-51C ESSENTIAL
BP-71C ADVANCED
SERIES

Digital Full Colour Multifunctional System

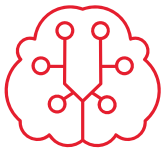

ESSENTIAL & **ADVANCED**

MFP COLOUR PRINTER **A3 SERIES**

Essentials/Advanced A3 MFP Series is here!

Sharp New Zealand proudly announces the launch of its new 'Essential' and 'Advanced' A3 Colour Multifunction Printer ranges, setting new standards for sustainability, intelligence, and reliability in office printing. Built on Sharp's next-generation BP platform, the new models deliver powerful performance, advanced security, and seamless cloud integration — all in a more environmentally responsible design.

Smart

- Microsoft Entra ID integration
- Cloud-based address book management
- Business card skew correction

Sustainable

- Body 50% recycled material
- Styrofoam-free packaging
- Industry-leading energy efficiency
- Industry-leading standby power consumption

Secure

- Storage erase support
- Automatic BIOS verification/recovery
- Advanced security for peace of mind

Highlights

Industry-leading Specs

- Scan speeds
- Std. OCR (advanced series)
- Office direct print
- Std. wireless LAN/NFC/Bluetooth (advanced series)
- Motion sensor
- Power consumption

New Features

- Entra ID/Azure AD support
- Centralised address book/user list
- Automatic BIOS recovery

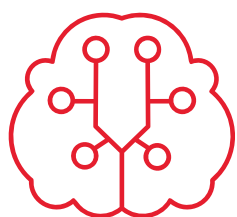

New Upgrades

- DSPF scan speeds
- Warm-up time
- A3 ppm
- Paper weight range
- Zoom range

Smarter

Effortlessly Streamlining Daily Office Tasks

When using a shared office or coworking space, there are only so many paper work documents you can keep on hand. To solve this problem, use an MFP to scan paper-based documents into digitised form so you can share them with others working at home or in a shared office. The MFP also lets you use text from paper documents as digital data. Now's the time to improve efficiency by embracing new ways of working.

Duplex Single Pass Feeder

Duplex Single Pass Feeder (DSPF) – The DSPF scans both pages of two-sided documents in one pass—in batches of up to 300 sheets. With scanning speeds of up to 300 opm (originals per min; two-sided), the MFP is quick to finish even large jobs. For more straightforward scanning needs, a Reversing Single Pass Feeder (RSPF) option is also available, efficiently scanning each side in sequence while maintaining excellent image quality.

Skewed Sheet Detection Sensors detect sheets that are not fed in straight—for example, a loose page of a corner-stapled document. If this happens, the DSPF stops automatically.

Multicrop and Image Crop Functions

Multiple receipts, photos, and other items can be scanned all at once, with each one saved as a separate file. This helps you streamline the filing of receipts and bills. The MFP can also crop photos from documents such as magazine pages and save them as individual files.

Business Card Management

The MFP reads the contact details on a business card via OCR^{*1} and then exports these to your chosen contact management system. A dedicated business card feeder on the DSPF^{*2} easily scans batches of up to 150 cards.

^{*1}: BP-51C series requires optional MX-EB20.

^{*2}: Available on BP-71C series.

Easy Scanning

Tap on the LCD touchscreen's Auto Set button to have the MFP perform a host of actions automatically. It can skip blank pages in a multi-page document or reorient pages mixed in upside down. The MFP also uses AI and image processing technology to automatically determine the optimal resolution, gradation, and compression rate for your scan jobs.

Irregular Size Detection When using the automatic document feeder (DSPF or RSPF) to scan, the MFP will automatically crop irregular-size documents to the optimal size.

Mixed-Size Scanning The MFP automatically distinguishes documents of mixed sizes (up to three different widths) fed through the DSPF.

Automatic Compression Rate The MFP automatically selects the optimal compression rate by judging text size and resolution.

Business Card Scanning Documents that the DSPF^{*} determines to be business card size are saved as separate files.

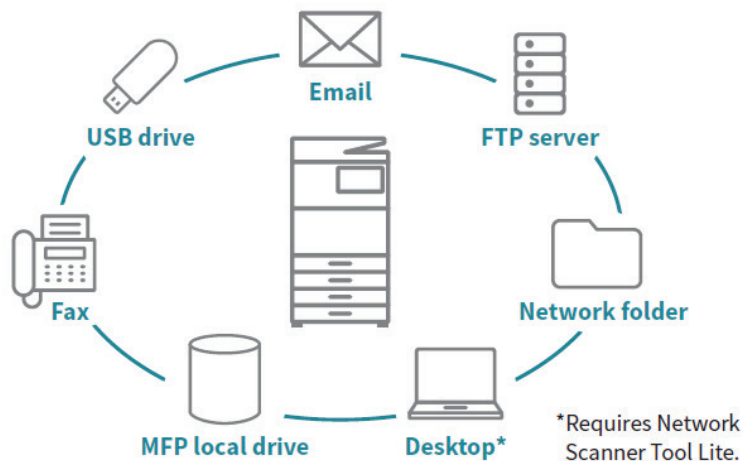

^{*}Available on BP-71C series.

Few Colour Scanning Ideal for originals that contain no photos, the MFP reduces file size while maintaining document quality.

Corrects Skewed Documents The MFP detects skewed documents and automatically adjusts them, so you don't have to re-scan them. This feature works for PDF and other file formats.

Scan Destinations

Scanned documents can be distributed in a number of ways, depending on the purpose, workflow, or network environment.

Even More Flexibility

Work styles are evolving, and many offices are embracing more digital, paper-light workflows. But the need for high-quality printed documents remains, from flyers and proposals to everyday business communications. With the new 'Essential' and 'Advanced' A3 Colour Multifunction Printer ranges from Sharp New Zealand, creating professional, vibrant, and secure documents in-house has never been easier. Designed for modern workplaces, these intelligent, sustainable MFPs are ready to be a reliable partner in your business.

Folding Unit*¹

This space-saving unit attaches to the MFP's paper output section. It automates various types of folds, such as Z-folds and C-folds, for efficient production of direct mail and other items. Install it together with a finisher*². You can even staple*³ Z-fold documents as well.

*1: Optional BP-FD10

*2: Optional BP-FN14/FN16

*3: Requires optional BP-FN14/FN16

Saddle Stitch Finisher*

This unit automates time-consuming tasks such as stapling and saddle-stitch binding. You get seamless output—from printing to finishing—of not only office meeting materials but also leaflets, business proposals, and brochures.

*Optional BP-FN14/FN16

Manual Stapler

A manual stapler on the finisher* lets you staple documents at the MFP without the need of a conventional stapler.

*Optional BP-FN18

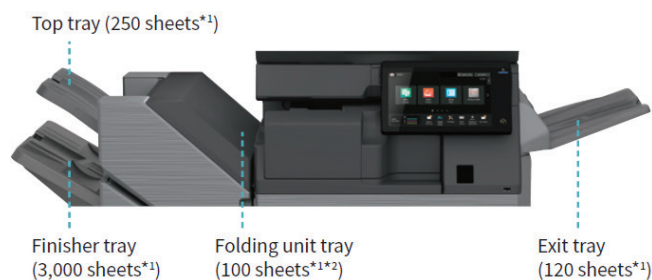

Stapleless Stapler

A staple-free stapler on the finisher* crimps the corner of paper to keep up to 10 A4 sheets securely bound.

*Optional BP-FN18

Output Capacity

The MFP can provide up to four output destinations when equipped with an optional finisher, folding unit, & exit tray.

*1: A4 80 g/m²

*2: 100 sheets when using the folding unit together with the BP-FN14/FN16 optional finisher and 200 sheets when using the folding unit alone.

Made with People in Mind

10.1-Inch Full-Flat Touchscreen

With a variety of functions accessible via simple, intuitive icons, MFP operation is smooth and easy. Customising the home screen has become easier than ever. The control panel can be tilted freely at various angles.

Speedy RSPF

The RSPF (reversing single pass feeder) efficiently feeds in either one- or two-sided originals—in batches of up to 100 sheets. With scanning speeds of up to 80 opm (one-sided), the MFP can complete large jobs with ease and efficiency.

Soft-Close Trays

The paper trays* have a soft-close mechanism that minimises vibration and lets you open and close the trays silently and smoothly with just a soft pull or push.

*Main unit tray and trays on optional DE13/DE14/DE15 (top tray only on BP-DE15).

People expect performance, quality, and simplicity from their office technology and MFPs are no exception. A stress-free user experience not only boosts productivity but also reduces operational costs. With the new range from Sharp, intuitive design meets powerful functionality. Featuring a 10.1" touchscreen and a consistent, user-friendly interface, these MFPs make everyday tasks simple and efficient for everyone. Now's the time to make Sharp part of a smarter, more comfortable workplace.

One-Touch Job Recall

The 10 most recent jobs—like copying, faxing, and scanning—can be called up on the LCD screen and their settings displayed. You can then change the settings as you like and repeat those jobs.

Automatic Toner Cartridge Eject Function

This function expels completely empty cartridges in preparation for replacement. The cartridge is replaced only after all the toner has been consumed, thereby ensuring efficient use of toner. Because you can tell at a glance when cartridges are empty, they are fast and easy to replace.

Toner Replacement without Stopping Printing*

If toner runs out during a print job, the MFP will continue printing your documents while you change the toner cartridge, ensuring that productivity won't miss a beat.

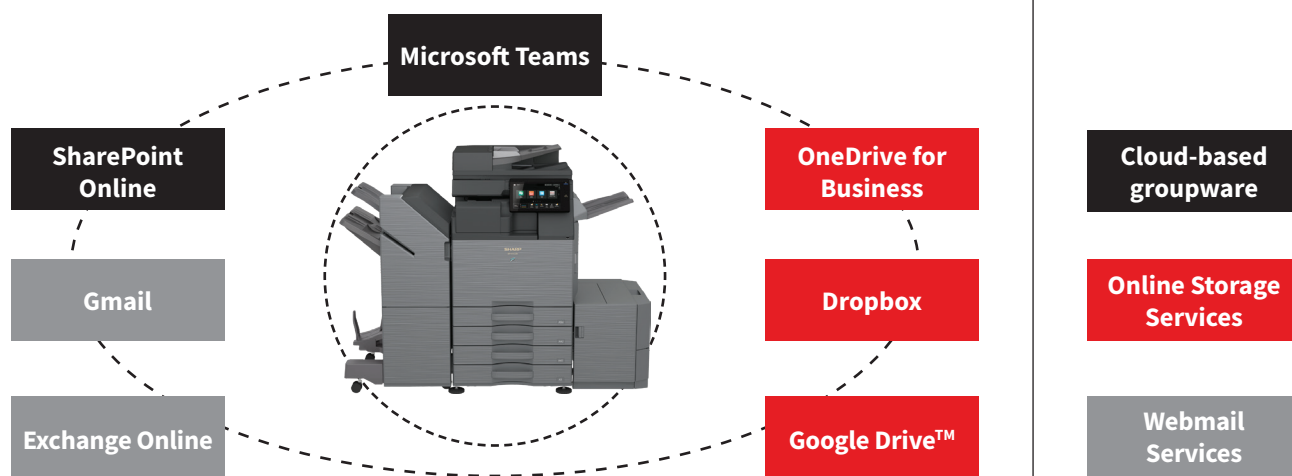

*Available on BP-71C65/71C55

Clever Connectivity

Make it easy for teams to access and share both digital and hard-copy information — no matter where they're working. The new range from Sharp enables fast, secure scanning and seamless connectivity to the cloud, so documents can be shared in just a few taps. With direct integration to platforms like Microsoft Teams, OneDrive, SharePoint, Google Drive™, Dropbox™, and Box™, your team can view, edit, and print documents whether they're in the office or working remotely. Now's the time to enable smarter, more connected collaboration with a Sharp MFP.

Application Portal*

You can download and install apps on your MFP via Sharp's Application Portal. App updates are easily recognisable, so you'll always be up-to-date on the latest services.

*Contact a Sharp customer representative for details.

Single Sign-on*

Once you log in to the MFP, its single sign-on feature allows you to quickly access multiple software services without having to sign in to each one separately.

*User authentication must be activated. Contact a Sharp customer representative for details.

Link with Mail Servers

Scanned data can be conveniently sent via your regular Gmail™ or Microsoft Exchange/Online account.

Sharp OSA* (Open Systems Architecture)

Linking MFP functions with third-party applications automates entire tasks, covering everything from input and processing to output, and boosting work efficiency.

*BP-51C series requires optional BP-AM10 and/or BP-AM11.

Link with Mobile Devices

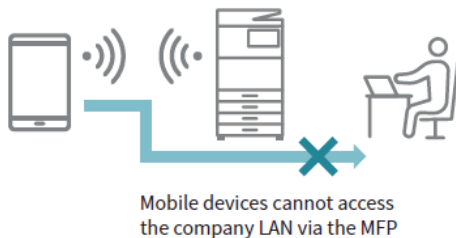

Wireless LAN Connection

The MFP connects wirelessly with PCs, smartphones, and tablets. It works with the 5 GHz band. This ensures minimal radio interference and stable high-speed communications. It also supports the WPA3™ (Wi-Fi Protected Access 3) security protocol featuring improved encryption.

Wi-Fi Direct

Personal mobile devices belonging to office visitors or staff can connect to the MFP one-on-one without going through the company LAN or access point.

Wi-Fi Protected Setup™

This makes it easy to connect the MFP to a secure wireless LAN without having to enter an SSID and security key.

Direct Printing/Scanning with USB Drives

Insert a USB drive into the MFP and a command screen will automatically pop up on the LCD. Right away you can print files from the USB drive, which are displayed as thumbnails, or you can scan documents directly to the USB drive.

Companies are helping usher in diversified work styles for their employees, and mobile devices like tablets and smartphones are an indispensable part of this new way of doing business. Swiftly linking MFPs with mobile devices streamlines complex, time-consuming workflows and gives easy access to data on devices. Now's the time to streamline tasks and create further value.

Microsoft Universal Print

The MFP supports this cloud-based print service. You can print via the cloud without the need for a print driver.

Sharp Print Service Plugin

This mobile printing technology allows printing from Android devices.

AirPrint

The MFP supports the AirPrint printing feature in Apple devices. It lets you print directly from a mobile device without the need for a print driver.

Chrome OS™

The MFP can print directly from Chromebook™ laptops.

Vivid Image Quality

Microsoft Universal Print

Auto Colour Mode provides fully automated copying and scanning in both colour and B/W. The MFP first determines whether a page is colour or B/W. It then analyses page contents to distinguish between different components (such as photos, text, and text on halftone backgrounds) and selects the appropriate mode. It uses machine learning to optimally reproduce text and images. Finally, it automatically removes unnecessary background colour*.

**Functionality depends on the colour of the background or type of document.*

Copying Originals with Highlighted Lines

Highlighter markings on a document are usually hard to reproduce. But with this MFP, they turn out visible in copies.

High-Resolution Output

The MFP's print engine supports 1,200 x 1,200 dpi printing and copying*. Fine lines and small text come out looking crisper and easier to read.

**Copying in B/W only.*

Secure

Comprehensive Protection

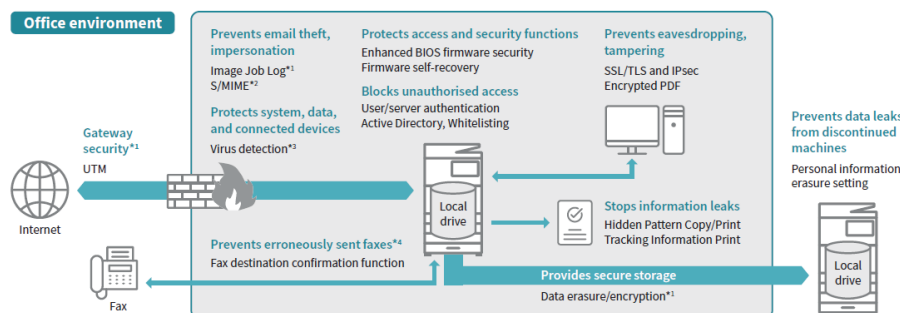

The MFP has multiple levels of security to keep the device and your precious data safe. When booting up, it checks for any anomalies in the BIOS firmware, aborting startup and launching automatic BIOS recovery if needed. For other firmware-related issues, the MFP attempts self-recovery to maintain system integrity. In addition, encrypted communications, secure print release, and storage erase support ensure that confidential information is protected throughout its lifecycle, giving businesses peace of mind and reliable data security.

Server Authentication

The MFP supports external server authentication functions such as LDAP and Active Directory. With centralised management of multiple user credentials, system administrators can keep track of multiple MFP usage.

Whitelisting

This function protects the MFP from fraudulent programs trying to access the file system and obtain information.

*1: Contact a Sharp customer representative for details. *2: Only when emailing scanned data. *3: Requires optional BP-VD10. *4: Requires optional BP-FX11.

BIOS Firmware Security

When booting up, the MFP checks for any anomalies in the BIOS firmware, aborting startup if a problem is detected. For other firmware-related issues, the MFP attempts self-recovery to maintain system integrity. In addition, the firmware can be automatically updated via a dedicated service, without requiring a service visit—ensuring your MFP always runs the latest, most secure system.

Virus Detection

Using the Bitdefender scan engine, the MFP defends against virus attacks on itself and connected devices. It scans for viruses and prevents the MFP from transmitting them to other devices like laptops and PCs.

Active Directory

By linking the MFP with Active Directory, users can access cloud services and network folders via the MFP by logging in with their authentication information. Besides the convenience of this single sign-on for users, system administrators can maintain a high level of security.

Data Encryption and Automatic Erasure

Job data is encrypted before being saved to the MFP's storage. Once the data is output or sent, it is auto-erased.

Personal Information Erasure

Retained personal information and other data can be erased when it's time to replace the MFP, preventing the leakage of confidential information.

Sustainable

Environmentally Responsible

Reducing environmental impact is an increasingly important part of running a business—whether it's cutting energy costs or meeting environmental regulations.

Offices need solutions that minimise their footprint without compromising performance. Sharp's new ranges are built with approximately 50% recycled materials, 100% styrofoam-free packaging, and industry-leading energy efficiency. Now's the time to make a Sharp MFP a smarter, greener choice for your office.

Eco-Friendly Toner

This toner is able to fuse at low temperatures, resulting in reduced energy consumption.

Energy-Saving Mode

The MFP has a low power consumption of only 0.3 W in network standby mode.

Pad Fusing System

This swiftly reaches the specified temperature, allowing fast warm-up and energy efficiency.

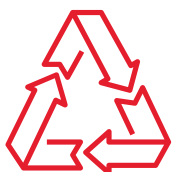

ENERGY STAR®

This MFP conforms to the ENERGY STAR programme thanks to various energy-saving functions.

Motion Sensor*

The MFP stays in sleep mode until the built-in motion sensor detects your approach to the MFP and wakes it up.

Other Key Features

Copy

- B/W Reverse
- Book Copy
- Card Shot
- Centring
- Cover/Tab Page Insertion
- Custom Image
- Job Build
- Job Program (48 items)
- Margin Shift
- Mirror Image
- Multi-Page Enlargement
- N-up
- Original Count
- Outer Frame/Centre/Side Erase
- Pamphlet Style
- Position Image
- Preview
- Proof Copy
- Repeat Layout
- Rotation Copy
- Print and Send
- Stamps
- Tab Copy
- Tandem Copy
- XY Zoom

Print

- Confidential Print, Print Hold
- Duplex
- Long Paper Printing
- N-up
- Tab Paper Print
- Watermarks

Scan

- Date and Name on
- File Document Filing
- Drop Out Colour Scan
